To obtain the source code under GPL, LGPL, MPL, and other open source licenses, that is contained in this product, please visit http://opensource.lge.com.

In addition to the source code, all referred license terms, warranty disclaimers and copyright notices are available for download.

LG Electronics will also provide open source code to you on CD-ROM for a charge covering the cost of performing such distribution (such as the cost of media, shipping, and handling) upon email request to <code>opensource@lge.com</code>.

This offer is valid for a period of three years after our last shipment of this product. This offer is valid to anyone in receipt of this information.

NOTE

- · Software-related content may be changed without prior notice due to upgrades of the product functions.
- · Some features described in the User Manual may not be supported in certain models and countries.
- · SNMP 2.0 is supported.

SETTINGS

Home

Global Buttons

- Pinput: Navigate to the external input selection screen.
- Settings: Navigate to the Settings screen.

Dashboard

 This feature displays key information about your Signage monitor in the center of the home screen. In the Dashboard, you can manually change settings by selecting the corresponding items.

· If the dashboard is locked, the focus does not move.

Content Manager

- Player: Play a variety of content including images, videos, music and SuperSign content.
- · Scheduler: Manage schedules for content that will be played at different times.
- · Playlist: Create a playlist with photos and videos.

Ez Setting

Video Wall

SETTINGS / ♥ → Ez Setting → Video Wall

Set Video Wall options to create a wide visual canvas.

- Tile Mode: Turn Tile Mode on or off. Display a single integrated screen on multiple Signage monitors.
- **Natural Mode**: Display the image excluding the area that overlaps with the monitor's bezel so that the image displayed has a more natural feel to it.
- White Balance Setting: Set the white balance. (menu location, picture mode, white pattern, color temperature, RGB qain and backlight)
- · Reset: Reset to initial settings.

On/Off Scheduler

SETTINGS / ♥ → Ez Setting → On/Off Scheduler

Set a schedule to use your signage by time and day of the week.

- On/Off Time Setting: Set on/off times for each day of the week.
- · Holiday Setting: Set holidays by date and by day of the week. (This feature may not be available for all models.)

Server Setting

SETTINGS / ♥ → Ez Setting → Server Setting

Set up to connect your signage to a SuperSign server. (The name of this feature may be different on some models.)

- CMS Server
- · Control Server

Fail Over

SETTINGS / ♥ → Ez Setting → Fail Over

This feature enables automatically switching to other input sources in **order of priority** if the primary signal is interrupted. It also enables the automatic playback of the photo and video content stored on your device.

- · Off: Turn off the Fail Over function.
- · Auto: Switch to other input sources in the predetermined order if there is no signal from the current input.
- Manual: Set switching priorities for inputs when there is no signal. In case there are multiple video signals, the current
 input switches to the input with the highest priority.
- · Reset: Reset to initial settings.
- USB: You can set this option to Off. Video. or Photo.
 - Off: Disable the Fail Over USB function.
 - Video: If you set this feature to Auto, a video is played back when there is no input signal. If you set this feature to
 Manual, a movie is played back when there is no signal from any of the prioritized inputs.
 - **Photo**: If you set this feature to **Auto**, a photo slideshow is played back when there is no input signal. If you set this feature to **Manual**, a photo slideshow is played back when there is no signal from any of the prioritized inputs.

Data Cloning

SETTINGS / ♥ → Ez Setting → Data Cloning

This feature is used to copy and import the settings of the device to other devices.

- Export Setting Data: Export the settings of the device to another device.
- Import Setting Data: Import the settings of another device into the device.

Sync Mode

SETTINGS / ☼ → Ez Setting → Sync Mode

Sync up time and content among multiple signage.

- · Sync Mode: Sync up time and content among multiple signages.
 - Master: Select as the Master.
- **Slave**: Play content at the same time as the Master monitor.
- Contents Sync: Sync the start times of content (videos or images that have been distributed by SuperSign Software) played back on the Master and Slave monitors.
 - On/Off: Enable or disable Content Sync feature.
- Time Sync: Sync the Slave monitors' clocks to the Master monitor's at a specified time via RS-232C.
 - Off(0-24): Set the sync time.
- · This feature may not be available for all models.

General

Language

SETTINGS / ☼ → General → Language

You can select the menu language to be displayed on the screen.

• Menu Language: Sets the language of your Signage monitor.

System Information

SETTINGS / ♥ → General → System Information

This feature displays information such as the device name, software version, and storage space.

Set ID

SETTINGS / ♥ → General → Set ID

- Set ID (1-1000): Assigns a unique Set ID number to each product when several products are connected via RS-232C. Assign numbers ranging from 1 to 1000 and exit the option. You can control each product separately by using the Set ID you assigned to each product. (For some models, the range of assign numbers is 1-255.)
- Auto Set ID: Automatically assigns a unique Set ID number to each product when several products are connected for display. (This feature may not be available for all models.)
- Reset Set ID: Reset the Set ID of the product to 1. (This feature may not be available for all models.)

Time & Date

SETTINGS / ♥ → General → Time & Date

This feature enables you to view and change the time and date on the device.

- · Set Automatically: Set Time and Date.
- Daylight Saving Time: Set the start and end times for Daylight Saving Time. The DST start/end times function only
 when you set them more than one day apart from each other.
- Time Zone: Configure the continent, country/region and city.
 - Select manual in City to set Custom Time Zone.

Power

SETTINGS / ♥ → General → Power

Power-related feature settings

No Signal Power Off(15 min.)

Set whether to use the 15 Min Auto Off feature.

- · You can set this option to On or Off.
- If you set this feature to **On**, the product turns off when it has remained in No Signal status for 15 minutes.
- If you set this feature to Off, the 15 Min Force Off feature is disabled.
- It is recommended that you set this feature to Off if you intend to use the product for long periods of time as the feature turns the power of the product off.

No IR Power Off

Set whether to use the No IR Power Off feature.

- · You can set this option to Off, 2 hours, 4 hours, 6 hours, or 8 hours.
- If you set this feature to 2 hours, 4 hours, 6 hours or 8 hours, the product turns off if there is no input from the
 remote control for the corresponding period.
- If you set this feature to Off, the No IR Power Off feature is disabled.

DPM

Set the Display Power Management (DPM) mode.

- If this feature is not set to Off, the monitor will enter DPM mode when there is no input signal.
- · If you set this feature to Off, DPM is disabled.
- · You can set this feature to Off. 5 sec. or 10 sec..

DPM Wake Up Control

Set conditions for releasing the DPM status according to the digital signal processing of the connected DVI/HDMI port.

- When set to Clock, the set checks for digital clock signals and releases the DPM status once it finds the clock signal.
- When set to Clock+DATA, the set releases the DPM status when both the clock signal and data of the digital signal
 are entered.
- · This feature may not be available for all models.

PM Mode

- Power Off(Default): Sets the normal DC off mode.
- Sustain Aspect Ratio: Identical to normal DC off mode except that the Switching IC remains on. On certain models,
 this applies only to a specific input mode (DisplayPort) and has the same effect as Screen Off
 Always in other input modes.
- Screen Off: Switches to Screen Off status when entering DPM, Auto Power Off (15 min, 4 hours), or Abnormal Shut
 Down mode.
- Screen Off Always: Switches to Screen Off status when entering DPM, Auto Power Off (15 min, 4 hours), Off Time
 Scheduling, or Abnormal Shut Down mode, or when there is input from the remote control's
 Power button or the monitor's Off button.
- Screen Off & Backlight On: Partially turns on the backlight to keep the display at a proper temperature when in Screen Off status.
- · This feature may not be available for all models.

In order for the screen to switch from Screen Off to On status, there must be input from the remote control's Power
or Input button, or the monitor's On button.

Power On Delay(0-250)

- · This feature prevents overload by implementing a power-on delay when multiple monitor sets turn on.
- You can set the delay interval in the range of 0 to 250 seconds.
- · This feature may not be available for all models.

Power On Status

- Select the operating status of the monitor when the main power has turned on.
- · You can choose from among PWR (Power On), STD (Standby), and LST (Last Status).
- PWR (Power On) keeps the monitor powered on when the main power has turned on.
- STD (Standby) switches the monitor to Standby status when the main power has turned on.
- LST (Last Status) switches the monitor back to its previous status.

Wake On LAN

- Set whether to use Wake On LAN.
- You can set the feature to On or Off for wired network.
- Wired Network: When set to On, the Wake On LAN feature is enabled, letting you turn the product on remotely through a wired network.

Power On/Off History

Display the device's power on/off history.

Network

SETTINGS / ☼ → General → Network

Wired Connection (Ethernet)

Wired Connection: Connects the monitor to a local area network (LAN) via the LAN port and configures wired
network settings. Only wired network connections are supported. After setting up a physical
connection, the display will automatically connect without any adjustments on most networks.
A small number of networks may require the display settings to be adjusted. For detailed
information, contact your Internet provider or consult your router manual.

Wireless Network Connection

If you have set your monitor up for a wireless network, you can view and connect to available wireless Internet networks.

- Input the new SSID: You can add a wireless network by manually typing in its name.
- · Access Point Search: Search access point again.
- WPS PBC: Press the button on the wireless router that supports PBC to easily connect to the router.

 When connected to a network that supports IPv6, you can select IPv4/IPv6 in the advanced wired/wireless network setting. But, IPv6 connection only supports automatic connection.

Tips for Network Settings

- Use a standard LAN cable (Cat5 or higher with an RJ45 connector) with this display.
- Many network connection problems during set up can often be fixed by re-setting the router or modem. After
 connecting the display to the home network, quickly power off and/or disconnect the power cable of the home
 network router or cable modem, Then power on and/or connect the power cable again.
- Depending on the Internet service provider (ISP), the number of devices that can receive INTERNET service may be limited by the applicable terms of service. For details, contact your ISP.
- LG is not responsible for any malfunction of the display or Internet connection failures due to communication errors/malfunctions associated with your Internet connection or other connected equipment.
- LG is not responsible for problems within your INTERNET connection.
- You may experience undesired results if the network connection speed does not meet the requirements of the content being accessed.
- Some INTERNET connection operations may not be possible due to certain restrictions set by the Internet service
 provider (ISP) supplying your Internet connection.
- · Any fees charged by an ISP including, without limitation, connection charges are your responsibility.

- · If you want to access the Internet directly on your display, the INTERNET connection should always be on.
- If you cannot access the Internet, check the network conditions from a PC on your network.
- When you use Network Setting, check the LAN cable or check if DHCP in the router is turned on.
- If you do not complete the network settings, the network may not function correctly.

! CAUTION

- Do not connect a modular phone cable to the LAN port.
- Since there are various connection methods, please follow the specifications of your telecommunication carrier or INTERNET service provider.
- · Network setting menu will not be available until the display connected to physical network.
- When a Wi-Fi dongle is used with a model that has only one USB input port, the distribution or content schedule via the SuperSign software is not available.

Tips for When Configuring Wireless Network Settings

- The wireless network may be affected by interference from a device that uses 2.4 GHz frequency, such as a wireless telephone, Bluetooth device or microwave. Interference may also be caused by a device that uses 5 GHz frequency such as Wi-Fi devices.
- The wireless network service may run slowly depending on the surrounding wireless environment.
- Some devices may have a network traffic jam if any local home networks are turned on.
- To connect to a wireless router, a router that supports wireless connection is necessary; the wireless connection
 function of the corresponding router must also be activated. Ask the router manufacturer whether the router
 supports wireless connection.
- To connect to a wireless router, verify the SSID and security settings of the wireless router. Please refer to the user guide of the corresponding router regarding SSID and security settings of the wireless router.
- The monitor may not work properly if network devices (wire/wireless router or hub, etc.) are incorrectly set up. Be sure to install the devices correctly by referring to their user guides before configuring the network connection.
- The connection method may vary according to the manufacturer of the wireless router.

Safety Mode

SETTINGS / ☼ → General → Safety Mode

Set to this function for safe performance.

ISM Method

If a still image is displayed on the screen for an extended period of time, image sticking can occur. The ISM method is a feature that prevents image sticking.

Mode

- · Sets the ISM Method mode.
- · Normal: Disables the ISM Method.
- Move: Moves the image's position on the screen by 3 pixels in a certain order to remove image sticking. (This feature
 is disabled if There is no input signal.)
- Inversion: Inverts screen colors to remove image sticking. (This feature is disabled if There is no input signal.)
- Color Wash: Alternately displays a white pattern and a color pattern to remove image sticking.
- · White Wash: Displays a white pattern to remove image sticking.
- Washing Bar: Displays a bar on the screen to make the image move smoothly. You can download a desired image and display it on the bar.
- User Image: Plays your photos or movies using a USB storage device.

Timer

- Immediately: Performs the ISM function immediately.
- Repeat: Performs the ISM function for the amount of time set in Time if the still image is maintained for the period set in Period.
- · Schedule: Performs the ISM function according to settings in Repeat Day, Start Time and End Time.
- · This feature may not be available for all models.

Period

- This option is available only when Timer is set to Repeat.
- · You can set the period between 1 and 24 hours.
- The ISM function is performed if the still image is maintained for the set period.

Time

- · This option is available only when Timer is set to Repeat.
- You can select from among 1 10 min / 20 min / 30 min / 60 min / 90 min / 120 min / 180 min / 240 min.
- The ISM function is performed for the set time.

Bar Image

- · This option is only available when Washing Bar is selected.
- Off: Displays a bar with a fixed resolution of 300 x 1080, then moves the bar.
- On: Displays a user-downloaded image, and moves the image. The image height is fixed at 1080 and the original
 width is maintained. However, the width is fixed at 300 if the original width is less than 300.
- If you download only 1 image, the image is displayed alone and the bar moves.
- If multiple images are downloaded, up to 4 images are consecutively displayed per cycle.

Bar Color

- · This option is applied when Bar Image is Off.
- This option is only available when Washing Bar is selected.
- You can choose from 6 colors: Red / Green / Blue / White / Black / Gray

Bar Transparency

- · This option is only available when Washing Bar is selected.
- · Off: Displays the bar opaquely.
- On: Displays the bar translucently. (Transparency: 50 %)

Bar Direction

- This option is only available when **Washing Bar** is selected.
- · Left to Right: The bar moves from left to right.
- Right to Left: The bar moves from right to left.

Repeat Day

- This option is available only when Timer is set to Schedule.
- · None: Performs the set schedule only once.
- · Monday-Sunday: The ISM function is performed on scheduled days and for scheduled period.
- · This feature may not be available for all models.

Start Time

- · This option is available only when Timer is set to Schedule.
- · Sets the start time of the ISM function.
- This feature may not be available for all models.

End Time

- This option is available only when Timer is set to Schedule.
- · Sets the end time of the ISM function.
- · This feature may not be available for all models.

How to Download an ISM Bar Image in Ez Download

- 1 In order to download an image in Ez Download, there must be an image file in an 'ism_bar' or 'ISM_BAR' folder on your USB storage device.
- 2 Delete the existing content stored on the internal memory before downloading a new image file.
- 3 Add [ISMBAR] as a prefix to the name of a file to distinguish the file from others (EPK, Logo, No Signal, etc.).
- 4 Download ISM photos or movies in Ez Download.

NOTE

- · You can download multiple images up to 5 MB in total.
- The total bit size of images must be under 50 MB for the images to be downloaded.
 For example, in the case of a 500 KB image with a resolution of 1920 x 1080, its bit size calculated by image decoding is about 7.91 MB (1920 * 1080 * 32 bit/1024/1024/8). Therefore, if you download 7 images of the same size, the total size of the images is about 3.5 MB, which falls within 5 MB. However, their total bit size is 7.91 MB * 7 = 55.3 MB, which exceeds the maximum bit size of 50 MB, so they cannot be downloaded.

How to Download an ISM Photo/Movie in Ez Download

- 1 In order to download a user image in Ez Download, there must be an user image file in an "ism or ISM" folder on your USB storage device.
- 2 Delete the existing content stored on the internal memory before downloading a new image file.
- 3 Add [ISMPHO] as a prefix to the name of a file for photos or [ISMMOV] if the file contains movies to distinguish the file from others (EPK, Logo, No Signal, etc).
- 4 Download ISM photos or movies in Ez Download.

Expert Controls

SETTINGS / ☼ → General → Expert Controls

PC/OPS Control

- PC/OPS Power Control: Enable you to control the power of the OPS as you turn on/off the display.
- Disable: Disable OPS Power Control.
- Sync (On): Synchronize the monitor's power status only when the monitor is on.
- Sync (On/Off): Synchronize the monitor's power status with the OPS.
- Control Interface Selection: This feature enables you to configure communication with the OPS connected to your
 monitor.
 - **Display**: Enable communication with external serial ports.
 - **OPS**: Enable communication with the OPS connected to your monitor.
- · This feature may not be available for all models.

Background Image

This feature enables you to set the default background image.

- Booting Logo Image: Change the logo image that appears when the device boots up. If you set this feature to Off, the Booting Logo does not appear.
 - Image Download: Download Booting Logo Image files onto your monitor. In order to download a Booting Logo Image, there must be a Booting Logo Image file in a "LG_MONITOR" on your USB storage device.

- The feature to update the Booting Logo Image only supports JPEG files of 1 MB or smaller can be used as Booting Logo Images.
- · Progressively encoded JPEG files are not applicable.
- · Make sure that Booting Logo Images have a resolution suitable for the screen resolution of the monitor.
- The maximum resolution for a Booting Logo Image is Full HD (1920 \times 1080) and HD (1360 \times 768). The minimum resolution for a Booting Logo Image is 64 \times 64.
- No Signal Image: Change the image that appears when there is no signal. If you set this option to Off, no image
 appears when there is no signal.
 - Image Download: Download No Signal Image files onto your monitor. In order to download an image, there must be an No Signal Image file in a "lg_sig" or "LG_SIG" folder on your USB storage device. The maximum total size of images to be downloaded: The total size should not exceed 10240KB (10MB).

- The feature to update No Signal Images only supports JPEG files of 1 MB or smaller.
- · Progressively encoded JPEG files are not applicable.
- The maximum resolution for a No Signal Image is Full HD (1920 x 1080) and HD (1360 x 768). The minimum resolution for a Booting Logo Image is 64 x 64.
- No Signal Image files with a resolution of Full HD (1920 x 1080) can cause image sticking.
- · Only No Signal Image files with English names are displayed correctly.

Input Manager

Specify a label for each input source.

SIMPLINK Setup

- When the SIMPLINK Setup is set to On, you can use the SIMPLINK provided by LG Signage.
- Device ID: Set the ID of the device connected via CEC wiring. You can choose a value between All and E.
- **Standby**: Sets the scenarios for sending and receiving the OpStandBy (0x0c) command. Detailed scenarios are as follows:

| | Transmission | Reception |
|--------------|--------------|-----------|
| All | 0 | 0 |
| Send Only | 0 | Х |
| Receive Only | Х | 0 |
| Off | Х | Х |

Crestron

- This function enables synchronization with applications provided by Crestron.
- **Server**: This menu sets the server's IP address for the network connection with the server (equipment provided by Crestron).
- Port (1024-65535): This menu sets the port for the network connection with the server. The default port number is 41794.
- IP ID (3~254): This menu sets a unique ID for synchronizing with the application.

Display

Picture Mode Settings SETTINGS / ♣ → Display → Picture Mode Settings

Picture Mode

This feature enables you to choose the optimal picture mode for your installation environment.

- · Mall/QSR, Transportation, Education, Gov.&Corp.: Display the picture optimally for your installation environment.
- Normal: Display the picture at normal contrast, brightness, and sharpness.
- APS: Adjust the screen brightness to reduce power consumption.
- Expert, Calibration: Allow an expert, or anyone who loves picture quality, to manually tune to the best picture quality.

- The kinds of Picture Mode you can select may vary depending on the input signal.
- Expert is an option that allows a picture quality expert to fine-tune the picture quality using a specific image. Thus, it may not be effective for a normal picture.

Customize

- **Backlight**: Adjust the brightness of the screen by adjusting the brightness of the backlight. The closer the value is to 100, the brighter the screen is.
- Contrast: Adjust the difference between the light and dark areas of the picture. The closer the value is to 100, the greater the difference is.
- Brightness: Adjust the overall brightness of the screen. The closer the value is to 100, the brighter the screen is.
- **Sharpness**: Adjust the sharpness of the edges of objects. The closer the value is to 50, the clearer and the sharper the edge becomes.
- Color: Soften or deepen the tints on the screen. The closer the value is to 100, the deeper the colors become.
- **Tint**: Adjust the balance between red and green levels displayed on the screen. The closer to Red 50, the redder the color will be. The closer to Green 50, the greener the color will be.
- Color Temperature: The higher you set the color temperature, the cooler the colors on the screen will feel. The lower
 you set the color temperature, the warmer the colors on the screen will feel.
- Expert Controls: Customize the advanced options.
 - **Dynamic Contrast**: Optimize the difference between the light and dark parts of the screen according to the brightness of the image.
 - Color Gamut: Select the range of colors available.
 - **Dynamic Color**: Adjust the tint and saturation of the image for a more vivid and lively display.
 - Color Filter: Accurately adjust color and tint by filtering a specific color area of RGB space.
 - **Preferred Color**: Adjust the skin tint, grass tint, and sky tint to your preference.
 - Gamma: Adjust gamma settings to compensate for the brightness of the input signal.
 - White Balance: Adjust the overall color fidelity of the screen to your liking. In Expert mode, you can fine-tune the
 picture using the Method/Pattern options.
 - Color Management System: Experts use the color management system when they adjust the colors by using
 the test pattern. The color management system allows you to make an adjustment
 by selecting from among 6 different color spaces (Red/Yellow/Blue/Cyan/Magenta/
 Green) without affecting other colors. In a normal picture, you may not notice the
 color changes you have made.

- · Picture Option: Customize the picture options.
 - Noise Reduction: Remove randomly popping dots to make the picture look clearer.
 - MPEG Noise Reduction: Reduce the noise generated in the process of creating a digital video signal.
 - Black Level: Adjust the brightness and contrast of the screen by adjusting the black level of the screen.
 (Recommended settings according to input signal: RGB 0–255: High, RGB 16–235: Low, YCbCr. Low)
 - Real Cinema: Optimize the video image for a cinematic look.
- Apply to All Inputs: Copies the current value of the detailed setting menu to the entire input, and applies only to the selected picture mode.
- Reset: Reset the picture settings. Because the picture settings are reset according to the monitor's picture mode, please select the picture mode before resetting the picture settings.

Aspect Ratio

SETTINGS / ♥ → Display → Aspect Ratio

This feature enables you to change the picture size to view the picture at its optimal resolution.

- Full: Stretch the picture to fill the screen.
- · Original: Display the picture at its original resolution.

Rotation

SETTINGS / ♥ → Display → Rotation

OSD Rotation

- · This feature rotates the screen clockwise.
- You can set this feature to Off/90/270.
- · When set to off, this feature is deactivated.
- It is recommended that you use content designed to be used in Portrait mode.
- · This feature may not be available for all models.

Position

· You can set the location of the rotated OSD as Top/Center/Bottom.

Pivot Mode

· This feature pivots the screen 180°.

Expert Controls

SETTINGS / ☼ → Display → Expert Controls

Energy Saving

- Smart Energy Saving: Automatically adjust the brightness of the screen according to the brightness of the picture to save energy.
 - On: Enable the Smart Energy Saving feature.
 - Off: Disable the Smart Energy Saving feature.
- Brightness Control: Adjust the brightness of the screen to save energy.
 - Off: Disable the Brightness Control function.
 - Minimum/Medium/Maximum: Use energy saving according to the energy saving level set for the monitor.
 - Screen Off: Turn off the screen after 3 seconds.
- · Brightness Scheduling: Adjust the backlight at specified times.
 - You can set this feature to On/Off.
 - Add schedule by setting the schedule time and backlight value.
 - If the current time has not been set, Brightness Scheduling is disabled.
 - You can add up to six schedules, and they are sorted in ascending order by time.
 - You can delete a schedule by selecting it from the list and pressing the **OK** button.

Adjust (RGB-PC)

This feature enables you to configure the PC display options in RGB mode.

- Auto Config.: Automatically adjust the screen position, time, and phase. The image displayed on the screen can be
 unstable for a few seconds in the process of the configuration.
- Resolution: Choose between 1024 x 768, 1280 x 768 and 1360 x 768 resolution.
- Position/Size/Phase: Adjust the options when the picture is not clear, especially when characters are shaky, after the
 auto configuration.
- · Reset to Initial Settings: Resets the options to default.
- · This feature may not be available for all models.

Sound

Sound Mode Settings

SETTINGS / \Rightarrow Sound \rightarrow Sound Mode Settings

Sound Mode

The best sound quality will be selected automatically depending on the video type currently being watched.

- Standard: This sound mode works well for content of all types.
- · Cinema: Optimize sound for watching movies.
- Clear Voice: Enhance voices so they can be heard more clearly.
- · Sports: Optimize sound for watching sports.
- · Music: Optimize sound for listening to music.
- · Game: Optimize sound for playing video games.

Balance

- Balance: Adjust the output volume for the left speaker and the right speaker.
- This feature may not be available for all models.

Equalizer

• Equalizer: Manually adjust sound by using the equalizer.

Reset

· Reset: Resets sound settings.

Audio Out

SETTINGS / ♥ → Sound → Audio Out

- Off: Disables the use of Audio Out. (No audio outputted.)
- Variable: You can specify an output range for the external audio device connected to the monitor and adjust the
 volume within the range. You can change the volume of an external audio device within the range of 0 to
 100 (the same as the Signage speaker volume). However, there may be a difference in the actual volume
 level outputted.
- Fixed: Set a fixed audio output level for the external audio device.
 - If there is no external input, no external audio is outputted.
 - The variable audio output level 100 is the same as the fixed audio output level.
- This feature may not be available for all models.

AV Sync Adjustment

SETTINGS / ☼ → Sound → AV Sync Adjustment

This feature adjusts audio timing to synchronize video and audio.

- Internal Monitor Speaker (-5~15): Adjust the sync of sound from the internal speakers. Moving closer to speeds up the audio output, while moving closer to + slows down the audio output, compared to the default value.
- **Bypass**: Output the broadcast signals or the sound from external devices without any audio delay. Audio may be outputted earlier than video due to the processing time for video that is inputted into the monitor.

Digital Audio Input

SETTINGS / ♦ → Sound → Digital Audio Input

This feature enables you to choose an input source for audio output.

- Digital: Output the audio contained in the digital signal inputted from the connected digital input source (HDMI, DISPLAYPORT, or OPS).
- Analog: Output audio from the digital input source (HDMI, DISPLAYPORT, or OPS) connected to the monitor through the Audio In port.
- · This feature may not be available for all models.

Admin

Admin Lock

SETTINGS / ♦ → Admin → Admin Lock

It keeps the existing settings because the Off/On button in the User menu only affects the active/inactive status of the submenu.

Change Password

SETTINGS / ☼ → Admin → Change Password

This feature enables you to set the password you use to enter the Installation menu.

- 1 Enter a new 4-digit password.
- 2 Enter the same password again in the Confirm Password field for confirmation.

Lock Mode

SETTINGS / ♥ → Admin → Lock Mode

Home Dashboard Lock

This feature enables you to restrict changes made to dashboard lock settings on the Home screen.

USB Lock

This feature restricts you from using a USB.

OSD Lock

This feature restricts you from using the OSD interface.

IR Operation Lock

- · If you set this feature to Off (Normal), you can use your remote control.
- · If you set this feature to On (Power Key Only), you can only use the power key.
- If you set this feature to **On (Block All)**, you cannot use your remote control.

Local Key Operation Lock

- This feature enables you to configure the Local Key Operation Lock feature so that settings or content cannot be changed.
- If you set this feature to **Off (Normal)**, you can use the local keys on the monitor.
- If you set this feature to On (Power Key Only), you can only use the power key.
- · If you set this feature to On (Block All), you cannot use the local keys.

- If IR Operation Lock and Local Key Operation Lock are both set to On (Block All), General > Power > Power On Status
 value switches to 'PWR'. Changing this value is not impossible to ensure the correct powering on operation. (To
 prevent mistakes by the user)
- If IR Operation Lock is set to On (Power Key Only, Block All), you can go to the menu screen by pressing and holding the Settings key for more than 5 seconds and entering the password.

Reset to Initial Settings

SETTINGS / ♥ → Admin → Reset to Initial Settings

This feature resets all items except the Quick Start items (Language, Screen Direction, External Input, Time, Power) to their initial settings.

Ez Download

SETTINGS / ♥ → Admin → Ez Download

Users can easily download Software Update, Logo Image, No Signal Image, Data Cloning and etc. from Ez Download.

Factory Reset

SETTINGS / ♥ → Admin → Factory Reset

This feature resets the items applicable for Reset to Initial Settings, Date, Time, Language, Network IP, and the Input Label Internal Storage files.

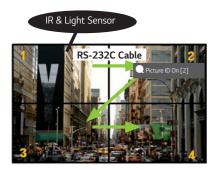

However, Calibration mode's RGB gain is an exception.

Picture ID

· This only applies to certain models.

Picture ID is used to change the settings of a specific set (display) using a single IR receiver for multi-vision. Communication is possible between a monitor with an IR receiver and other monitors using RS-232C cables. Each monitor is identified by a Set ID. Setting **Picture ID** allows you to only use the remote control with monitors with a **Set ID** that matches the **Picture ID**.

1 Assign **Set ID** to the installed monitors as shown below:

- 2 Press the red Picture ID On button on the remote control.
- 3 Make sure that the Picture ID you set is identical to the **Set ID** of the monitory you wish to control.
- A set with a **Set ID** that is different from the **Picture ID** cannot be controlled by IR signals.

- If Picture ID has been set to 2, only the upper right monitor, which has a Set ID of 2, can be controlled by IR signals.
- If you press the green Picture ID Off button on your remote control, the Picture ID for all monitors are turned off. If
 you then press any button on the remote control, all monitors can be controlled by IR signals regardless of their Set
 ID's.

CONTENT MANAGER

Content Manager

Player

The Content Manager app's player feature enables you to play video content, image content, template content and playlist content in an integrated way.

Play

- 1 Select your desired type of content from the tab on the left and then select your desired content.
- 2 Click **Play** in the upper right-hand corner of the screen and enjoy the content you have selected.

Scheduler

HOME / ↑ → (Scheduler)

The Content Manager app's scheduler feature enables certain content to be played at a scheduled time through a playlist or external input.

Creating a Schedule

- 1 Click **Add New Schedule** in the upper right-hand corner of the screen.
- 2 Choose between Playlist and Input.
- 3 1) If you have selected **Playlist**, select the playlist you wish to schedule the playback of.
 - 1-1) You can cancel schedule creation by clicking the Cancel button.
 - 2) If you have selected **Input**, select the external input source you wish to schedule the playback of.
 - 2-1) You can cancel schedule creation by clicking the Cancel button.
- 4 Enter schedule information and create a new schedule.
 - 1) You can go back to the Playlist / Inputs screen by clicking the Back button.
 - 2) You can go back to the Scheduler screen by clicking the Cancel button.
- 5 Watch the playlist or external input you selected play back at its scheduled time.

Deleting a Schedule

- 1 Click **Delete** in the upper right-hand corner of the screen.
- 2 Select the schedules you wish to delete.
- 3 Click Delete.
- 4 Check that the schedules have been deleted

Playing a Schedule Now

- 1 On the Scheduler screen, select the schedule you wish to play.
- 2 After selecting the desired schedule, select **Play Now** on the bottom right corner of the screen.
- 3 Watch the playlist or external input you selected plays back.

Editing a Schedule

- 1 On **Scheduler**, select the schedule you wish to edit.
- 2 After selecting the desired schedule, select **Edit** on the bottom right corner of the screen.
- 3 If the selected schedule is a playlist, playlist edit window will appear. If it is an external input, external input edit window will appear. Select the **Playlist / Input** you wish to edit.
 - 1) You can cancel schedule editing by clicking the Cancel button.
- 4 Enter schedule information to edit a schedule.
 - 1) You can go back to the **Playlist / Inputs** screen by clicking the Back button.
 - 2) You can go back to the Scheduler screen by clicking the Cancel button.
- 5 Check the edited Scheduler.
- 6 Watch the playlist or external input you selected play back at its scheduled time.

- When creating and editing a schedule, you cannot include characters that cannot be used in file names on Windows

 such as \, \, \, \, *, *, *, *, *, *, *, and | in the name of the schedule file. You cannot create a schedule if file names include such characters.
- In addition, if the playlist linked to the schedule contains content files whose names include such characters, you cannot move or copy the playlist.
- If the schedule creation time overlaps, the previously created schedule is deleted.
- If there is an existing schedule with the same name, change the name to create a schedule.
- · Schedule does not work while Scheduling list app is running.

Playlist

HOME / ↑ **↑ (Playlist)**

This feature creates playlist using content in a USB and automatically plays back the created playlist when the monitor is turned on.

Create Playlist

- 1 Click Create New Playlist in the upper right-hand corner of the screen.
- 2 Select the desired content and click **Complete**.
- 3 Check the created playlist.

Power On Play Setting

- 1 Click **Power On Play** in the upper right-hand corner of the screen.
- 2 Select the desired playlist and click **Complete**.
- 3 Check the selected playlist play back when the monitor is turned on.

Delete Playlist

- 1 Click **Delete** in the upper right-hand corner of the screen.
- 2 Select the desired playlists and click **Delete**.
- 3 Check that the playlists have been deleted.

Photo Playback Speed Setting

- 1 Click **Settings** in the upper right-hand corner of the screen.
- 2 Select the desired time and click **Save**. (You can set this feature to 5/10/20/30.)
- 3 Check the playback speed when the playlist plays back.

Edit Playlist

1 Select the playlist you wish to edit.

Add Content

- 1 Click **Add Content** in the upper right-hand corner of the screen.
- 2 Select the desired content and click **Complete**.
- 3 Check that the content has been added.

Change Content Order

- 1 Click **Change Order** in the upper right-hand corner of the screen.
- 2 Select and move the desired content.
- 3 After moving the content to the desired location, click **Complete**.
- 4 Check that the content order has been changed.

Delete Content

- 1 Click **Delete** in the upper right-hand corner of the screen.
- 2 Select the desired content and click **Delete**.
- 3 Check that the content has been deleted.

Supported Media File Formats

Supported Video File Formats

- Maximum data transfer rate: 20 Mbps (Megabits per second)
- Maximum supported resolution: 1920 x 1080 @ 30p (only Motion JPEG 640 x 480 @ 30p)

| Extension | Codec | | |

| | Sample freq. | 8 kHz - 48 kHz | |
| | Support | MPEG-4 | |
| WAV | Bit rate 64 kbps - 1.5 Mbps | | |
| | Sample freq. | 8 kHz - 48 kHz | |
| | Support | LPCM | |
| | Bit depth | 8 bit / 16 bit / 24 bit | |
| WMA | Bit rate | 128 Kbps - 320 Kbps | |
| Sample freq. 8 kHz - 48 kHz | | 8 kHz - 48 kHz | |
| | Support | WMA7, WMA8, WMA9 Standard | |
| WMA 10 Pro | Bit rate | - 768 Kbps | |
| Sample freq. M0: up to 2 Channel @ | | M0: up to 2 Channel @ 48 kHz (Except LBR mode) | |
| | M1: up to 5.1 Channel @ 48 kHz | | |
| | | M2: up to 5.1 Channel @ 96 kHz | |
| | Support | WMA 10 Pro | |
| OGG | Bit rate Free Format | | |
| | Sample freq. | 8 kHz - 48 kHz | |
| | Support | OGG Vorbis | |

• The playback speed of BMP and PNG files can be slower than JPEG.

Tips for using USB storage devices

- · Only USB storage devices are recognized.
- USB storage devices connected to the monitor through a USB hub may not work properly.
- USB storage devices that use an automatic recognition program may not be recognized.
- USB storage devices that use their own drivers may not be recognized.
- The recognition speed of a USB storage device may depend on each device.
- Please do not turn off the display or unplug the USB device when the connected USB storage device is working.
 When the device is suddenly separated or unplugged, the stored files or the USB storage device may be damaged.
- Please do not connect the USB storage device which was artificially maneuvered on the PC. The device may cause
 the product to malfunction or fail to be played. Remember to only use USB storage devices that store normal music,
 image, and/or movie files.
- · Storage devices formatted with utility programs that are not supported by Windows may not be recognized.
- Please connect power to a USB storage device (over 0.5 A) which requires an external power supply. Otherwise, the
 device may not be recognized.
- · Please connect a USB storage device with the cable offered by the device maker.
- · Some USB storage devices may not be supported or operated smoothly.
- · Some models do not support USB external hard disks.
- File alignment methods of the USB storage device is similar to Windows XP and filenames can include up to 100 English characters.
- Be sure to back up important files since data stored in a USB memory device may be damaged. We will not be responsible for any data loss.
- If the USB HDD does not have an external power source, the USB device may not be detected. So make sure to connect it to an external power source.
 - Please use a power adapter for an external power source. No USB cable is provided for an external power source.

- If your USB storage device has multiple partitions, or if you use a USB multi-card reader, you can use up to four partitions or USB memory devices.
- · If a USB storage device is connected to a USB multi-card reader, its volume data may not be detected.
- If the USB storage device does not work properly, remove it and connect it again.
- The speed at which a USB storage device is detected differs from device to device.
- If the USB storage device is connected in Standby Mode, a specific hard disk will automatically be loaded when the display is turned on.
- The recommended capacity is 1 TB or less for a USB external hard disk and 32 GB or less for USB memory.
- · Any device with more than the recommended capacity may not work properly.
- If a USB external hard disk with an energy saving feature does not work, turn the hard disk off and on again to make it work properly.
- USB storage devices (USB 2.0 or below) are also supported. However, they may not work properly in the videos list.
- · A maximum of 999 folders or files can be recognized under one folder.
- Only use USB storage devices that have been formatted with the FAT32 file system. Storage devices formatted with utility programs that are not supported by Windows may not be recognized.
- · USB 3.0 may not work properly.
- · For some USB storage devices, data may be damaged under high temperature.
- Playing back content using 2 or more USB ports is not recommended.

IR CODE

- All models do not support the HDMI/USB function.
- Some key codes may not be supported depending on the model.

| Code (Hex) | Function | Remarks |
|------------|---------------------------------------|-----------------------|
| 08 | () (Power) | Remote control button |
| C4 | MONITOR ON (Monitor On) | Remote control button |
| C5 | MONITOR OFF (Monitor Off) | Remote control button |
| 95 | (Energy Saving) | Remote control button |

CONTROLLING MULTIPLE PRODUCTS

· This only applies to certain models.

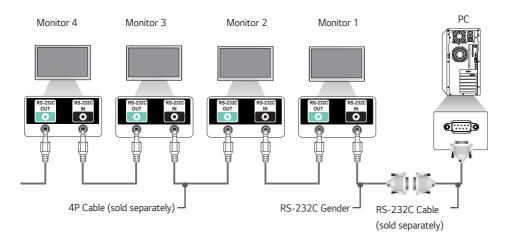

Use this method to connect several products to a single PC. You can control several products at a time by connecting them to a single PC.

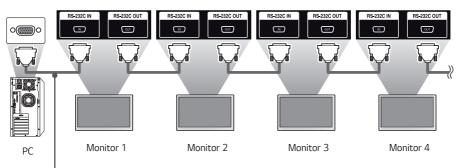

In the Option menu, the Set ID must be between 1 and 1000 without being duplicated.

Connecting cables

• The image may be different according to the model. Connect the RS-232C cable as shown in the picture.

The RS-232C protocol is used for communication between the PC and product. You can turn the product on/off, select an input source and adjust the OSD menu from your PC.

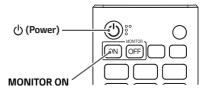

RS-232C Cable (sold separately)

Communication Parameter

Baud Rate: 9600 BPS
Data Length: 8 bits
Parity Bit: None
Stop Bit: 1 bit
Flow Control: None
Communication Code: ASCII

- When using 3-wire connections (non-standard), an IR daisy chain cannot be used.
- Be sure to only use the provided gender to connect properly.
- When you have daisy-chained multiple Signage products to control them simultaneously, if you attempt to turn on/off the master device in a continuous manner, some products may not turn on. In this case, you can turn those monitors on by pressing the MONITOR ON button, not the Power button.

- Commands may not work when there is no external input used.
- Some commands may not be supported on some models.
- During USB operations such as DivX or EMF, all commands except Power (ka) and Key (mc) are not executed and treated as NG.

Transmission/Reception Protocol

Transmission

[Command1][Command2][][Set ID][][Data][Cr]

- * [Command1]: Identifies between the factory setting and the user setting modes.
- * [Command2]: This command is used to control the monitor.
- * [Set ID]: Used for selecting a set you want to control. A unique Set ID can be assigned to each set ranging from 1 to 255 (01H to FFH) or from 1 to 1000 (001H to 3e8H) under Settings in the OSD menu. Selecting '00H' or '000H' for Set ID allows the simultaneous control of all connected monitors (The maximum value may differ depending on the model.)
- * [Data]: Transmits command data. Data count may increase depending on the command.
- * [Cr]: Carriage Return. This parameter corresponds to '0x0D' in ASCII code.
- * []: White Space. This parameter corresponds to '0x20' in ASCII code.

Acknowledgment

[Command2][][Set ID][][OK/NG][Data][x]

- * The product transmits an ACK (acknowledgment) based on this format when receiving normal data. At this point, if the data is FF, it indicates the present status data. If the data is in data write mode, it returns the data of the PC computer.
- * If a command is sent with Set ID '00' (=0x00) or '000'(= 0x000), the data is reflected to all monitors and they do not send an acknowledgment (ACK).
- * If you send "FF" as the value of the data in control mode via RS-232C, you can check the value currently set for the relevant feature (not applicable to some features)
- * Some commands may not be supported on some models.

01. Power (Command: k a)

Controls the power on/off status of the monitor.
